i360 Pro Summer '20 - Version 30.5

Overview: improveit 360's Pro Summer 2020 Release focuses on new feature functionality that leverages Salesforce's lightning web component technology, an interactive Zendesk bot built in the user interface and many of smaller enhancements and bug fixes.

Product Enhancements

- 1) Attachment Manager
 - The Attachment Manager is an action across the following objects that allows users to filter and search for documents and images to easily see their thumbnails and data: Prospect, Lead Source, Marketing Opportunity, Appointment, Quote, Sale, Receipt & Adjustment, Project and Project Activity.
 - a. Navigate to any of the following objects to upload an image or document sample: Lead Source, Marketing Opportunity, Appointment, Quote, Sale, Receipt & Adjustment, Project and Project Activity.
 - b. In the breadcrumb trail navigate back to the related Prospect record and open the Attachment Manager. You can access the Attachment Manger in two places: buttons across the top of the page or scrolling down next to the related list on the prospect.

2) Quick Sale

130 East Chestnut St., Suite 200 | Columbus, Ohio 43215 | 866.421.3360 | improveit360.com

UAT Documentation

The ability to start at Search & Create and land on the sale page brings users a friendly way to create all the necessary records up to the sale page for a quick sale.

a. Navigate to Setup>Custom Settings> Public System Settings>Manage and ensure that the 'Enable Lightning Quick Sale' checkbox is true to ensure this feature is enabled.

b. First populate all the fields in the search and create component from the home page and click Go. Once the results are shown, click the Create New drop down and select Prospect & Sale. Ensure all the fields you populated in search and create are also filled in the Quick Sale Lightning Web Component (LWC).

3) Prospect Timeline

The Prospect Timeline is a new accordion style component that orders key objects by specific dates and allows you drill down on data without navigating away from the prospect page.

Note: The objects and the key dates determining their order are below.

- Lead Source: Take On
- Marketing Opportunity: Due Date
- Appointment: Appointment Date
- Quote: Created Date
- Quote Item: Created Date
- Sale: Sold On
- Sale Item: Created Date
- Receipt & Adjustment: Received
- Project: Project Start Date, if Project Start date is blank the create date will be used
- Project Activities: if the type is "Appointment" the Start date will display and order the Project Activity, if the Start date is blank the timeline will default to the created date. If the type of Project Activity is a "Task" the Due date will display and order the Project Activity, if the Due date is blank the timeline will default to the created date.
- Project Costs: Created Date
- Purchase Orders: Created Date
- Tasks: Due Date

UAT Documentation

- Event: Start Date Time
- Note: Created Date
- b. Select a Prospect that has an Appointment with a Quote, a Sale with a Receipt & Adjustment and Project with a Project Cost and Project Activity. You may need to create some of these records if the prospect and related data does not exist.

c. Navigate back to the prospect page and scroll down to the related tabs section. Open the Prospect Timeline Tab and ensure that all the objects in the previous step are in the timeline and ordered according to their key date in step (a). Expand the Parent Objects (Appointment, Sale and Project) to see the children objects.

4) Zendesk Bot

- a. The Zendesk Bot has been embedded across improveit 360's object model to ensure immediate access to support articles and our support team.
- b. First, navigate to setup > custom settings > public systems settings > manage.

i. Edit Public System Settings and ensure the 'Enable Zendesk for Salesforce Licenses' and the 'Enable Zendesk for Salesforce Platform' checkboxes are True.

Enable Zendesk for Salesforce Licenses 🕗 🔽

Enable Zendesk for Salesforce Platform 🕗 🔽

c. Select a record in the breadcrumb trail to test the Zendesk bot.

130 East Chestnut St., Suite 200 | Columbus, Ohio 43215 | 866.421.3360 | improveit360.com

UAT Documentation

d. In the bottom right-hand corner, you will see the Zendesk bubble. Click to open the bot and then ask a question. After choosing to 'Get in Touch', put in a sample ticket.

UAT Documentation

7) Project Activity and Event Custom Setting

During the scheduling process of Project Activities customer can now turn on/off the Conflict pop-up that shows when another project activity or event conflicts with the one being scheduled. Note: this setting is currently global for all users and profiles in this release. improveit 360's next release will enhance this setting to respect user and profile specific settings.

 To ensure the setting is enabled Navigate to Setup > Custom Settings > Public System Settings > Manage > Edit the Public System Settings. Ensure that 'Show Event Conflicts' and 'Show Project Activity Conflicts' checkboxes are true.

b. First, we'll need an already existing project activity and event assigned to a staff member and when scheduling a second project activity you will select to assign to the same staff member for the same date and time.

	Project Activity Name	Assigned To	Туре	Start	End	Comple
. *	Audit	Jeff White	Appointment 🗸	8/16/2020	8/16/2020	
ţ		Conflict(s): <u>Conflicting Event</u> <u>Install</u>	Find Time	8:00 AM	7:00 PM	

- c. You will notice the conflicting project activity and event will be displayed in an alert message next to the project activity you are scheduling.
- d. Next, navigate back to the Public System Setting from step (b) and turn the 'Show Event Conflicts' and 'Show Project Activity Conflicts' checkboxes to False.
- e. Follow step (c) again for scheduling a project activity to a staff member that has a conflicting project activity and event. Now you will not see the alert message!

UAT Documentation

8) New User Welcome Email Rebranded

Note: each email provider interprets images and links differently so depending on your provider you may only be able to test certain parts of this email template.

- a. The 'New User Email Template' has been rebranded to have the most updated improveit 360 logo and embedded training video.
- Navigate to Setup > My Templates > Folder = Template-Users > select the 'New User Email Template'

- 9) Product Grid Sliding Column/Row Header
 - a. The Production Grid tab now has scrolling Column and Row headers so that users can have many projects vertically and many non-templated project activities horizontally and still see the projects across the left and the project activity names across the top. You may need to create a project template and a few projects using that specific template to test this. Once you have enough data prepared navigate to the Production Grid Tab in the '+'.
 - b. Start scrolling either down or left and notice the project scroll right and the project activity names scroll down with you.

11) Project Activity Drag and Drop Times Maintained

- a. The Staff Calendar when in the 'day by staff' view and dragging and dropping a project activity to another staff member would revert to default 12:00 AM 12:00 AM.
- b. Find a project activity on the staff calendar and drag it to another member and notice the start and end times are maintained through the rescheduling.
