# improveit 360

Product Enhancements 10/19

Display Distance From Appointment to Appointment on the Staff Calendar
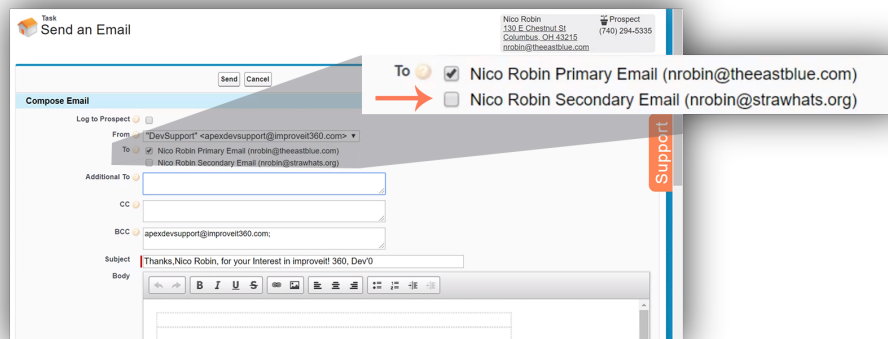

The convenience of the distance feature on the scheduling calendar has now been added to the staff calendar! Easily see the straight line distance to get from appointment to appointment in your staff calendar.

*NOTE - *This enhancement will be applied to new records added to the Staff Calendar after the update. It will NOT be applied retroactively to existing records.*

Primary AND Secondary Emails can be Selected from the Print/Email Screen

Users can now select the prospect's primary, secondary, or both emails when using the Print/Email button.

Product Enhancements 10/19

Batch Appointment Notification Emails

Users now have the ability to send out all sales rep appointment notifications at a specific time of the day instead of having them sent out as they are scheduled. Email batching can be turned on in settings.

Activity History Logging on Emails Sent Via List Views

Emails sent via list views will now have the Activity History populated with the date and time the email was sent for each record.

Added Support for Canadian Zip Codes

Updated Canadian Zip Code Data Set

Canadian zip codes now correspond to the correct region of the city per the postal service.
